

■平均在院日数(重症度別)【第4(上半)期】

※このデータは、2021/07/07時点までの集計結果を掲載します。

Table with 54 columns representing hospitals and 15 rows representing patient categories (e.g., 悪性の悪性新生物, 結核の悪性新生物, etc.). Each cell contains numerical data for various metrics, including average length of stay.

Table with 15 columns for hospital names and 25 columns for metrics (acute, chronic, stone, etc.) with sub-rows for '重症度の指標なし' and '全体'. Includes a '(単位:日)' header row and a final '(人)' row for patient counts.
